

Ethernet I/O: Software Support

High-performance OPC Server for all Acromag Ethernet I/O ◆ Low-cost server exclusively for Acromag I/O

Description

Acromag's Modbus/TCP Master OPC DA Server delivers high-speed connectivity to all Acromag Modbus TCP/IP slave devices via Ethernet. This server is designed for all local or remote OPC clients such as HMI, SCADA, operator interface and custom-built (Visual Basic, Visual C++[®]) applications.

This OPC server offers the most reliable, cost effective and comprehensive features list available in the OPC/HMI market today.

Our unique read/write tag optimization algorithms provide unmatched data transfer speeds between OPC server and hardware devices.

Acromag's OPC server has passed the OPC Foundation's OPC Data Access 3.00 compliance test.

This server includes comprehensive, context-sensitive help systems, Visual Basic OPC client example application with Visual Basic source code, and a pre-built client executable.

Compatible With Leading HMI and SCADA Packages

Acromag's Data Access Server can be used as a data server to any HMI or SCADA package that is OPC compliant. Additionally, the online help system will guide you through the configuration for popular packages from Wonderware, Intellution, Rockwell, GE, and others.

Key Features & Benefits

- Runs on Windows XP, Vista, 7, 2003 Server, 2008 Server
- Designed exclusively for use with all Acromag Modbus/TCP Ethernet devices
- OPC compliance tested
- Unlimited OPC clients, devices, or items
- Supports OPC custom and automation interfaces such as Visual Basic and C++
- Easy CSV import / export capability
- Modbus packet optimization for fast transactions
- Runs as a stand-alone executable or unattended with no login required
- Device status dialog for easy diagnostics

Free 30-day Trial Version

Download a no-risk demonstration version and try it free for 30 days. Once you see how easy it is and the robust functionality, you can quickly convert the trial version to a full product license.
